

MaxiCalm

PASTE

Chamomile • L-Theanine • Lemon Balm

1

L-Theanine

High levels of the quick acting calming aid, L-Theanine helps relieve stress and anxiety quicker than most herbal and natural mood relaxers.

2

Vitamin B1

Thiamine helps maintain nerve function and assist with balanced nerve movement, thus calming the body naturally.

3

Chamomile Flowers Extracts

Known by many as a natural sedative, chamomile acts directly in the cognitive area to reduce stress and anxiety.

4

Passionflower Extract

Naturally increasing GAMA acids in the brain, passionflower reduces tension and lowers anxiety and stress.

5

Valerian Root

Acting as a natural mild sedative, valerian root has been used for years by humans to relieve anxiety, stress and tension. Safe for cats and dogs alike.

7

Catnip

A powerful smelling herb containing nepetalactone that helps relax cats and dogs and also assists in some digestive issues.

6

L-Tryptophan

An amino acid known to help relieve aggression, stress and have a calming effect in cats and dogs.

8

Lemon Balm Extract

Having natural muscle-relaxing and antispasmodic effects and assisting in stomach sensitivities, lemon balm helps in numerous ways to relieve discomfort and stress.

Inactive Ingredients:

De-ionised Water, Guar Gum, Carbopol, Pure Dried Liver Powder,

Storage:

- Store in a cool, dry place.
- Avoid direct sunlight.
- Store in an airtight container.
- Keep container tightly closed.

Dosing Guidelines:

Use average 1ml per 5kg body weight of MaxiCalm twice per day. If relaxing effect is overwhelming, reduce to 1ml per 5kg once per day. Do not exceed 4ml per 5kg per day.

Pull apart pets' lip and squeeze paste into side of mouth.

OR

Gently squeeze out measured paste amount and let your pet lick off the paste from tube opening.

*Maintenance dose - Feed as directed

*Stressful event preparation - Feed double the directed dose 24hours before the event

*Prolonged events (longer than 24 hours) Continue on x 1.5 times directed dose until stressful event finishes. Monitor behaviour. Decrease dosing gradually if desired calming effect is reached earlier until directed dosage is reached.
