

MaxiTox PASTE

Kaolin • Activated Charcoal • Bentonite Clay

1

Activated Charcoal

Effectively binds most toxins and poisons very fast! Although not a life-saving remedy, Activated Charcoal is a must for first line defence!

2

Kaolin

A natural clay that helps bind and absorb toxins and other may help bind possible pathogens.

4

Cranberry Extract

Cranberry is a very potent anti-oxidant and helps increase immunity that may help improve recovery after poisonings and toxin exposure.

3

Bentonite Clay

Pharma grade bentonite clay soothes the stomach lining and forms a barrier that may block some toxins and delay absorption of harmful chemicals.

SIZES

30ml | 60ml

Toxin Binder

Shelf life - 18 Months*

Dogs

Cats

MaxiTox is a potent combination of toxin binding clays, carbons and various other detoxifying agents. MaxiTox cannot bind to all types of toxins and we recommend that you consult a veterinarian before administering the product to a patient.

Active Ingredients:

Activated Charcoal, Kaolin, Benonite Clay, Cranberry Extract

Inactive Ingredients:

De-ionised Water, Guar Gum, Carbopol, Sodium Benzoate

CAUTION: This product can stain!

Storage:

- Store in a cool, dry place.
- Avoid direct sunlight.
- Store in an airtight container.
- Keep container tightly closed.

*Nutrimed cannot indicate specific types of toxins or poisons for which MaxiTox can or cannot help. MaxiTox is not a cure or treatment. It is a first aid supplement that attempts to buy the patient time to get to a veterinarian that can administer medical treatment. Discussion with your veterinarian is strongly advised!

Dosing Guidelines:

Administer approximately 1ml per 2kg body weight directly into the dog or cat's throat or side of the mouth, daily.

Do not to attempt to dose dogs or cats that are already in shock and convulsing to avoid getting bitten.

Pull apart pets' lip and squeeze paste into side of mouth.
